

WELCOME FALL WITH A LUMINOUS AND RESTED LOOK!

The eye contour is a very fragile area. The epidermis is more sensitive and 5 to 7 times thinner than the rest of the face, encouraging the appearance of fine lines, dark circles and under-eye puffiness. Take care of your eye contour this Fall and embrace the new season with hydrated and glowing eyes.

New Formula

Erase dark circles

Especially designed for the fragile under-eye area, **Oligo-Protéines Marines** provides a complete solution for pigmented dark circles. Formulated with a Complex of Marine Oligo Proteins and a Hawthorn and Arabian Jasmine Complex, this serum reduces the colored appearance of this extremely delicate area for a genuine anti-dark-circles effect.

Smooth fine lines

Wrinkles and fine lines are the main sign of skin aging. They appear at the age of 25 and settle in over time. Recommended for Skin Instants® with fine lines and wrinkles, **Elastine** stimulates the synthesis of elastin, the protein responsible for the skin tissue elasticity. Apply morning and night to restore elasticity, suppleness and firmness.

New Product

Follow by the application of an eye cream

Biologique Recherche eye creams are intended for both young and more mature Skin Instants® to moisturize, relax or smooth skin. Pick yours between the **Biosensible**, **VIP O2**, and **Biofixine** options.

Soothe puffiness

Biologique Recherche's new serum **Lipomose** is specifically made to treat the eye contour puffiness. Formulated for congested eyes, it provides a long-lasting solution by targeting aqueous and fatty eye bags and those due to cutaneous aging. Fluid and ultra-penetrating, its texture is ideal for the fragile area of the eye contour and the eyelids.

FALL TIPS

Get rid of tightness

Exposed to stress factors such as fatigue, sun, cold, and pollution, our skin can get more sensitive. When the epidermis is devitalized, the skin loses its radiance. After the Summer months, it is essential to regenerate, soothe and repair our skin. Here is a selection of some Fall cream favorites:

Reparation UV repairs the skin after sun exposure by radically slowing down the peeling process and signs of ageing triggered UV exposure.

Emulsion Gel Biosensible fuses hyaluronic acid, royal jelly extract and silk extract to provide instant relief, nourishment, and strength to the skin. Use the **SR** version if your skin is oily!

Control acne

If acne usually gets under control during Summer, it is important to prevent and treat it in the Fall as breakouts can reappear. Here is a selection of acne essentials:

First apply **Lotion P50 1970** to rebalance the pH of your skin and exfoliate, then detoxify with **Masque Vivant** and use **Complexe Iribiol** to regulate sebum and keep skin clear.

Recently reformulated, **ISO-Placenta** and **Crème ISO-Placenta** make the best duo to prevent and soothe acne and scars. Apply morning and night and enjoy a smoother and more uniform skin.

New Formulas

SAY BYE TO END-OF-SUMMER DRYNESS

Are you dealing with crocodile like skin post Summer sun? Hydrate and nourish it with this selection of body products.

Huile Fondamentale and **Huile Benefique** are your secret weapons to protect and repair your skin and hair! Highly regenerating, Huile Fondamentale combines 6 pure botanical oils known for their antioxidant, moisturizing and regenerative properties. Huile Benefique contains lipid-restoring active ingredients to sublimate the skin and hair, making it softer, shinier and full of vitality.

Crème Matricielle, former **Crème Reparatrice**, now combines two lipopeptides to enhance skin density and tone. Marine Coral Plant extract combined with Shea Butter help restructure and strengthen the skin barrier to revive collagen production mechanisms. Apply morning and/or night to enjoy a firm and hydrated skin

FALL HAIR NECESSITIES

Non-abrasive and gentle, **Lotion P50 Capillaire** is loaded with hydroxy acids, vitamin B3 and jojoba extract, a formula that doesn't strip the scalp of the natural oils but purifies it from the root. Apply to the scalp to leave it exfoliated, rebalanced, free of dandruff and soothed.

Masque Biologique Capillaire repairs, nourishes and fortifies hair. Combining Yeast and Shea Butter extracts, this mask is ideal to restore dry hair and protect it against external aggressions.

Prevent seasonal hair loss with **Complexe Cegaba + Bioproline**. This treatment features anti-hair loss peptides and growth stimulating acids that have a fortifying and revitalizing action on the scalp.

Recommended as a 1 to 3-month treatment, the **Complexe Cegaba + Bioproline** serum comes in 12 individual vials. Apply onto your scalp after washing your hair, do not rinse. Use with the **Mini Massage Glove** for a better penetration and scalp stimulation

LATE FALL EXFOLIATION

It is important to differentiate early Fall and late Fall for your skincare regimen. Indeed, the exfoliation process, primordial in Fall, should be started around late October or early November. Exfoliating too soon would mean losing all the benefits from the sun (and your tan) early. Here is the Biologique Recherche trio lineup recommended to be used at the end of Fall season.

Revive your skin with **Lotion MC 110**. Rich in exfoliating, plumping and renovating ingredients, this booster can be used alone or as a complement to your **Lotion P50**. Enhancing the epidermal functions of the skin, this plumping and renovating product tones and plumps wrinkles and fine lines. Gently pat your face, neck and décolleté, focusing on the nasolabial lines and cheekbones. Your complexion will be unified, your skin clear, toned and glowing!

Renew, regenerate and repair with **Sérum 3R**. This targeted serum focuses on the primal ageing effects; wrinkles, lack of firmness and loss of radiance. Full of exfoliating acids, antioxidants and oligosaccharides, it provides the skin with what it needs to renew itself, and prevent and correct visible signs of aging. Apply morning and night to see a smooth, strengthened, toned, brightened and hydrated skin!

Revitalize uneven skin with **Crème aux Acides de Fruits**, a potent treatment that deeply exfoliates and brightens the skin. Loaded with alpha hydroxy acids and cellular oligopeptides, this cream helps remove dead skin cells on the skin surface, tighten pores and smooths fine lines.

Recommended for devitalized, dull and/or stressed Skin Instants, **Crème aux Acides de Fruits** can be used as a one-month treatment and combined with a moisturizer to reveal a new, perfectly exfoliated and repaired skin for Fall/Winter.
